

To whom it may concern:

ENVO Drive Systems is an innovative engineering company with a focus on evolving electric mobility to offset the impact of fossil fuels on our planet. We design and build affordable clean transportation solutions for everyone.

We retained Lead Generators International (LGI) to spearhead a major expansion of our dealer network. LGI was tasked with building a prospective dealer list; creating compelling scripts and emails; making the required cold calls to introduce our company to prospective dealers; get dealers interested in our products; qualify interested dealers; and then forward those leads to our sales team.

In short order, LGI delivered a significant number of qualified leads that will keep our sales team busy for months.

I am confident we couldn't have done a better job even if we'd built our own in-house team – certainly not in the condensed timeframe in which LGI delivered, and not for the fees LGI charged.

For any company looking for a sophisticated lead gen team that can generate substantial results cost-effectively and quickly, LGI is your go-to company.

We are looking to expand in to the US and LGI will most certainly be a part of our go-to-market strategy in the US and other countries around the world.

Best regards,
